The most sensational sale of seasonable goods ever to come from Patterson's store. Prices have been smashed back to the levels of a quarter century ago. It means a complete disposal of our huge and fresh Spring stock! We're starting to reduce our Spring stock early, and we know it's going to take low prices to do it. MIGHTY LOW PRICES! And with that in mind, we've whammed away at our already low regular prices with unflinching disregard of former prices.

The purpose of this sale is not altogether a selfish one. We want to distribute this big stock of Spring merchandise to the public at a time when they need it, and need to make the savings. To win new customers for our store. Here's prices you can afford to pay.

The Lure of Open Spaces

BY BRUCE CATION NEA Editorial Writer

is a strange thing, the way an artfully-chosen photograph m set the mind roving.

Mr. Ordinary Citizen sets out for his job on a spring ming. The early sunshine and the crisp breeze, chilly but rying a promise of warmer weather a little later on, have done things to him: made him question, perhaps, the risdom of a life that keeps him pent up in a town all the time, him to draw out again that old dream of some day living s place in the open country. Then, opening his newspaper, he spots a photograph of

those "open country" scenes that editors like to present sin s while, a picture, say, of a valley in western Montana, a tumbling mountains in the distance and a fringe of es by a little stream in the foreground. And as he looks at it he suddenly discovers that a town

a poor sort of place to ra man to live. The fine new buildso on, things which ordinarily seem to him to be matters Be proper local pride-now they have become artificial dees by which he is cut off from contact with his own earth, hev are obstacles in his way and he pays for their presence gan unfulfilled longing for the sort of thing of which the notograph speaks. And this in turn, is apt to set him speculating about that

sparkling new dream which technologists have been revolv ng lately. Some of these men have remarked that the era of great city is about over; that in the future all men will ive on the dorsill of the open country, with factory units broken up and decentralized, with electric power pulling instrial and rural areas closer and closer together, so that no worker will any longer be held a prisoner by any town. Now all of that, to be sure, is a long way in the future, and Mr. Ordinary Citizen probably has moments in which he wouldn't care much for it anyway. But a spring morning, a revival of the old, perennial discontent, an ordinary photograph of a western valley—they can act powerfully to set a man's mind adrift from its moorings. They invite his inner self to play the truant.

Legalizing Betting

A SAMEWHAT saner attitude toward blue laws away dawny gards of the counsels said. "I mean—whe said. "I mean—whe said. The Lure of Open Spaces

BY BRUCE CATION NEA Editorial Writer

is a strange thing, the way an artfully-chosen photograph m set the mind roving.

Mr. Ordinary Citizen sets out for his job on a spring ming. The early sunshine and the crisp breeze, chilly but rying a promise of warmer weather a little later on, have done things to him: made him question, perhaps, the risdom of a life that keeps him pent up in a town all the time, him to draw out again that old dream of some day living s place in the open country. Then, opening his newspaper, he spots a photograph of

those "open country" scenes that editors like to present sin s while, a picture, say, of a valley in western Montana, a tumbling mountains in the distance and a fringe of es by a little stream in the foreground. And as he looks at it he suddenly discovers that a town

a poor sort of place to ra man to live. The fine new buildso on, things which ordinarily seem to him to be matters Be proper local pride-now they have become artificial dees by which he is cut off from contact with his own earth, hev are obstacles in his way and he pays for their presence gan unfulfilled longing for the sort of thing of which the notograph speaks. And this in turn, is apt to set him speculating about that

sparkling new dream which technologists have been revolv ng lately. Some of these men have remarked that the era of great city is about over; that in the future all men will ive on the dorsill of the open country, with factory units broken up and decentralized, with electric power pulling instrial and rural areas closer and closer together, so that no worker will any longer be held a prisoner by any town. Now all of that, to be sure, is a long way in the future, and Mr. Ordinary Citizen probably has moments in which he wouldn't care much for it anyway. But a spring morning, a revival of the old, perennial discontent, an ordinary photograph of a western valley—they can act powerfully to set a man's mind adrift from its moorings. They invite his inner self to play the truant.

Legalizing Betting

A SAMEWHAT saner attitude toward blue laws away dawny gards of the counsels said. "I mean—whe said. "I mean—whe said. "I mean—whe want to talk about?" tion legalizing horse racing and horse race betting; and before you start deploring such a step, consider the situation late existed in Ohio in years near fore you start deploring such a step, consider the situation walk, can 17 Come on. We'll the whole affair now. If Roll radio again, tuned in a noisy or came he would simply find that he drop in at Stanley's."
